

The Austin Chapter of the Associated
General Contractors of America (AGC)
presents

The Basics of Commercial HVAC Systems

INSTRUCTOR: Chris Grawburg, PE, The HVAC Training Institute, Inc.
DATE/TIME: June 17, 2009 from 8:00am to 12:00pm
Location: Austin Chapter AGC Boardroom
COST: \$200 per student
AUDIENCE: General Contractors, Architects, Engineers, Building Owners, Facility Managers
CONTENT: This half day program created especially for Construction Professionals will provide you with a broad understanding of the Basics of Commercial HVAC Systems. Understand what your mechanical contractor is talking about!

Topics covered include:

How to heat and cool building air;	Common HVAC systems and how they work
How air is delivered to the space	Constant volume package units
How to ventilate a space	Constant volume split systems
How to control air to the space	Variable air volume (VAV) rooftop systems
How to read "M" drawings	Self-contained VAV units
What you missed on bid day!	Water source heat pumps
Did your superintendent see this?	Hydronic systems
Green HVAC – HVAC & LEED
