

Virginia Chapter

THE BASICS OF COMMERCIAL HVAC SYSTEMS

August 19

Giving Construction Professionals the Competitive Advantage

Enroll in The Basics of Commercial HVAC Systems to learn how to broaden your knowledge of HVAC systems and their major components.

Project managers, estimators and superintendents of commercial general contractors will benefit from participating in this course. It is also approved by the American Institute of Architects (AIA) for 4 hours of Health, Safety, & Welfare hours AND 4 hours of Sustainable Design hours for architects.

Attendees Will:

- Identify the major components of commercial HVAC systems
- Understand the basics of how an air conditioning unit works
- Recognize the most common commercial HVAC systems by identifying key components on an installed project
- Gain basic HVAC plan reading skills
- Be aware of common mistakes that occur on bid day
- Understand HVAC/GC Arch coordination issues during construction
